every description of Gas Fittings,

HINGES, HANDLES, &c.

SPIRE AND GABLE CROSSES,

*And all kinds of Architectural Metal Work.*

# PREFACE.

---

FROM its earliest introduction amongst the Industrial Arts, that of working in Metal has especially devoted itself to the services of Religion; the chiefest ornaments of the first building erected as a temple of the Almighty were its utensils of Metal, and in all ages, and in all times, it has delighted to offer the tribute of its skill to the services of the Church.

Here, in the early Christian History of our own land, the kingly Alfred,—the learned Alcuin,—and the faintly Dunstan, lent not only their fostering aid, but gave their operative skill to its culture, and there is scarcely a name eminent in Science or in Art which has not sought to incarnate in the pliant metal the spirit of its genius. Ghiberti, Cellini, Donatello, Raphael, Giotto, Michael Angelo, have all striven to outvie each other in their various designs for and works in Metal, devoted to the usages of the Church, which fostered their skill and rewarded their endeavours.

Of late years, too, an earnest desire has arisen to render, so far as purity of design and excellence of material and craft can render, the accessories of our religion worthy of their dedication, and a more truthful and artistic spirit has thus been infused amongst them,—the earliest to receive this impression was the art of working in metal, and it is the most strenuous endeavour and the fondest hope of the issuer of this Catalogue to sensibly aid this movement. For more than 14 years he has pursued this aim, and he trusts, not without success. To those who have so materially contributed to this result by their patronage and advice he now tenders his most grateful thanks, assuring them that his increased facilities will enable him to render his future productions even more worthy of their purpose than his past have been.

As an indication of the course of his manufacture, he sends forth the present Catalogue, not as a new Pattern Book, but simply to serve as a guide for the price of those articles his Customers may require; his object being to impress on each individual article a particular and individual merit, rather than to reduce them all to one dull repetition of the same form. The prices, therefore, attached to the articles simply indicate how much labour and material can be procured for so much money, but in every instance a special estimate will be given for the work required, and, if necessary, a special design furnished.

In ordering any article, it is particularly requested that the style of the building to which it is an adjunct, its dedication, size, and other information may be sent, which will enable the manufacturer to carry out his grand aim:—*to render all the accessories he furnishes so many appropriate parts of the whole, instead of, as is frequently the case, making them simply incongruities.*

## LIST OF PRICES.

Agnus Dei Cases, in Silver, from 10s.

Altar Bread Boxes, with Preffer,

White Metal plated, from 7s.6d.

German Silver plated, from 12s.

As Fig. 8, Plate H, plated, 35s.

11in. „ „ 20s. „ „ 7s. 6d.

Fig. 12. Iron, with Majolica-ware tiles and slate bottom, 8in. cube, 30s.

12in. cube, 35s.

16in. cube, 40s.

18in. cube, 40s.

Larger sizes at special prices.

## Fonts and Covers, (see plate P.)

Metal Fonts were by no means so rare in old work as is generally supposed, and records of them are of frequent occurrence. Fonts entirely of Metal can now be readily made, and designs will be forwarded for them on application. Metal work, combined with stone or marble, produces an excellent effect. In Illustration, Fig. 3. the Angels and Bassi relievi are intended to be deposited by the electro-type process, and the shields borne by the former enamelled with emblems or monograms. The outer tier of shafts, with their capitals, of wrought brass, and the inner columns of serpentine, the bowl and base of the Font being of Rouge Royal or other coloured marble, and the cover of wrought iron and brass, illuminated in colour.

The cost of such a Font and Cover would be from 100 to 150 Guineas

The other Covers shewn in this Sheet are flat Covers in Oak and Iron, Fig. 1. 2/ Fig. 2. 4/.

Small Portable Fonts are also made for the private administration of the Sacrament of Baptism, preventing the necessity of the unseemly substitutes so commonly resorted to. These can be had in brass, Electro-plate, or Silver, in Morocco Case, from 35s. each.

### Gas Pendants, (see plate R 3.)

Fig. 1. Polished Brads, 35s.    Fig. 2. 40s.    Fig. 3. 7/ 10s.    Fig. 4. 3/ 10s.    Fig. 5. 25/.

(See also Coronas.)

### Gas Standards, (see plate R 4.)

Fig. 1. 7/    Fig. 2. 3/ 10s.    Fig. 3. 2/ 10s.    Fig. 4. 3/

### Handles for External Doors, (see plate I 1.)

Fig. 1. 3 inch ring	Fig. 2. 2 inch ring	Fig. 3. 5 inch ring
" 4. 4 " "	(Suitable also for Font Covers, which see.)	" 5. 7 " "
" 6. 5 " "	Fig. 7. 3 inch ring	" 8. 6 " "
" 9. 4 " "
